## SKILLS

- Extensive experience developing, managing, and delivering complex nonprofit programs in the biomedical space
- Managing multi-million dollar budgets- including forecasting, invoicing, and resource allocation
- Data-driven strategy formulation and decision-making
- Relationship building, leading, and collaboration across cross-functional teams, particularly with executives, finance, IT, legal, and marketing
- Computing- Office (MS/GSuite/Trello/Workday AP), AI (LLMs, RAG), Data Analysis (Python/R/Matlab)
- Communication of complex financial and scientific data to various levels of the organization
- Familiarity with regulatory standards and compliance requirements in healthcare

## EXPERIENCE

### PROGRAM COORDINATOR- SES

2021.03–2025.03

- ◇ **Managed international research portfolio** at *Wellcome Leap* with 40 teams from academia, biotech, and non-profit sectors
- ◇ Successful program outputs include: cancer drug and gene therapy targets moving towards clinical trials, 3 companies out of stealth mode, 43 publications, 11 patents, >\$120M external follow-on funding ([link to program pubs on biorxiv](#))
- ◇ Complete **responsibility for \$55M Budget**- Reporting, invoicing, accounting, forecasting, and resource allocation
- ◇ Delivered quarterly business reports to COO/DoO/Comptroller
- ◇ Negotiated, executed, and **managed > 30 Contracts** (SOWs, Licensing Agreements, and Data Sharing Agreements)
- ◇ Prepared project briefs and proposals for BODs, CEO/COO, other NPOs, VCs, and government organizations
- ◇ Established and **administered** secure, international data management platform w/**100+ TBs of patient data**
- ◇ Produced data-driven visuals and guidance for marketing
- ◇ Launched program and selected proposals in oncology, infectious disease, proteomic technology development, and computational modeling (machine learning, mechanistic models, agent-based models, foundational models)
- ◇ Organized and co-led six Program All-Hands Meetings (>70 participants, 5 different countries)

### VISITING POSTDOC- HHMI Janelia Research Campus 2020.01–2021.03

- ◇ Wrote successful scientific proposal with budget to fund biomedical research
- ◇ Developed ex vivo single molecule assay for whole brain imaging using lattice light sheet microscopy
- ◇ **Led international neuroscience projects** remotely during Covid lockdown

### POSTDOCTORAL FELLOW- University of Oxford

2014.06–2021.03

- ◇ Research Focus- Mechanisms of RNA regulation in synaptic plasticity
- ◇ **Published 12 peer-reviewed articles** ([link to full list of publications](#))
- ◇ **Delivered >30 presentations** at invited research seminars and international science conferences
- ◇ **Trained 10 junior team members**
- ◇ Wrote and deployed data analysis code (Python, R, ImageJ/java, Matlab) on remote UNIX servers
- ◇ Procured, applied and maintained > \$1M in lab equipment and reagents

## EDUCATION

### PHD BIOLOGY University of Kentucky

2011.09–2014.05

- ◇ **Published 9 peer-reviewed articles**
- ◇ **Trained 12 junior team members**
- ◇ Wrote multiple successful scientific proposals, including budgets

### MS IN BIOLOGY Marshall University

2009.01–2010.12

### BS IN CHEMISTRY Marshall University

2004.09–2008.12
